

Project Initialization And Planning Phase

Date	06 JULY 2024
Team ID	739909
Project Name	Unlocking Silent Signals: Decoding Body Language With Mediapipe
Maximum Marks	3 Marks

Define Problem Statements (Business Problem Specification Template):

Businesses and individuals often struggle to interpret non-verbal cues, leading to miscommunication and missed opportunities. Our goal is to develop a system using Mediapipe that accurately decodes body language in real-time. This system will enhance communication, decision-making, and engagement by providing immediate feedback on silent signals. Target users include businesses, healthcare professionals, educators, and individuals seeking to improve personal interactions. The expected outcome is improved understanding and interpretation of non-verbal cues, resulting in more effective and meaningful communication.

I AM	I'M TRYING TO	BUT	BECAUSE	WHICH MAKES ME FEEL
A business professional	enhance communication and decision-making in meetings.	I struggle to interpret non-verbal cues accurately.	understanding body language requires expertise and real-time analysis	uncertain and less confident in my interactions

Problem Statement (PS)	I am	I'm trying to	But	Because	Which makes me feel
PS-1	A business professional	enhance communication and decision-making in meetings.	I struggle to interpret non-verbal cues accurately.	understanding body language requires expertise and real-time analysis	uncertain and less confident in my interactions
